

DORLING KINDERSLEY SOFTWARE

I Love Science! 1.1

Send your science grades soaring (and have a blast doing it)! In three experiment-filled labs you'll discover amazing facts and important principles about the everyday science that's all around you. The best way to learn science is to run your own experiments. Over 100 interactive ones make it fun (and safe) to do! Let loose in the lab! Students learn about biology as they investigate the human body, plants, animals and the environment. In the physics lab students can experiment with electricity, forces, heat, light and sound. By testing, mixing, heating and measuring materials, students can create a working chemistry lab. Toss a ball into outer space, build a car, create a food web and perform dozens more experiments in physics, chemistry and biology. Includes a challenging question-and-answer session and full science reference.

Great Reviews!

"One of the widest ranging science CDs"- *Popular Science*

"What every science teacher dreams of...engaging and interactive tool."- *Media & Methods Magazine*

"With its signature Dorling Kindersley graphics and clever interactive games, this CD-ROM more than lives up to its name...The program features a special section for parents, including tips for supporting kids' science exploration."- *FamilyPC*
