

For students who know home team batting averages but struggle with BASIC math competency: **Practice with sports-themed math drills!**

Sports Math series

Learning important math skills is now as easy and fun playing your favorite sports games!

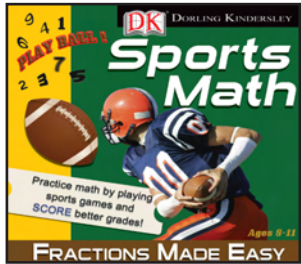

“These titles have a longevity that makes them a valuable investment.”
Educational Computing and Technology:

“Students will enjoy the gaming aspect...Easy... to understand and use.”
International Society for Technology in Education (ISTE)

- A6227NVH Network \$359.99

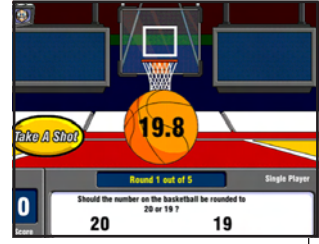

PERCENTAGES MADE EASY

- A6258SVH 2 CDs \$29.99
- A6289LPH 5 CDs \$69.99
- A6265SLH 30 CDs \$359.99
- A6272NVH Network \$359.99

Sports Math is a collection of games designed to let students practice their math skills under the enthusiastic direction of sports desk anchor Les Dynam and roving reporter Sam Mathews who introduce each game and comment on the action and progress.

Kick a “fractioned” soccer ball through a goal post or measure your skill at the long jump in meters; it’s all about using math skills in everyday life until taught concepts are fully learned!

KEY FEATURES

- Follows NCTM (National Council of Teachers of Mathematics)
- Number and Operations Standard for Grades 3 through 8
- Teacher Options give control over game settings.
- Most activities deal with real-world applications.
- Immediate feedback on practice exercises
- 1 or 2 player mode so students can team play

Ages 8-11
Win 95 98 ME 2000 NT XP Vista
Mac 8.1/Mac 10.2+
